PROFESSIONAL SUMMARY

Results-driven Data Science graduate with a BSc in Data Science, majoring in Statistics and Computer Science from University of KwaZulu-Natal. Strong background in statistical analysis, predictive modelling, data cleaning, dashboard development, and programming. Proven ability to transform raw data into accurate insights using SAS, Python, SQL, Excel, and Power BI. Experienced in hypothesis testing, regression modelling, survey analysis, reporting, and communicating findings to technical and non-technical audiences. Recognised for accuracy, problem-solving, analytical thinking, and delivering high-quality results under pressure.

CORE COMPETENCIES

Statistical Analysis • Data Analysis • Predictive Modelling • Logistic Regression • Hypothesis Testing • Sampling Techniques • Data Cleaning • Data Validation • Data Visualisation • Dashboard Development • Reporting • SQL • Python • SAS • Power BI • Excel • Power Query • Machine Learning Fundamentals • Research • Problem Solving • Attention to Detail • Communication

EDUCATION

BSc in Data Science
University of KwaZulu-Natal
Majors: Statistics & Computer Science | Completed: Dec 2025

PROFESSIONAL EXPERIENCE

Tutor and Academic Support Leader | University of KwaZulu-Natal | 2024 – 2025

- Tutored Statistics and Computer Science modules including STAT130, COMP100, COMP106.
- Simplified complex quantitative concepts and improved student understanding.
- Provided one-on-one support, problem-solving guidance, and academic mentoring.
- Demonstrated leadership, communication, and stakeholder support skills.

PROJECTS

Cardiovascular Disease Risk Analysis | SAS

- Built logistic regression models to identify significant predictors of disease risk.
- Performed chi-square tests, model selection, diagnostics, and goodness-of-fit checks.
- Delivered evidence-based insights using statistical interpretation.

General Household Survey Data Analysis | SAS

- Cleaned national household data and compared sampling methods for precise estimation.
- Analysed income levels, confidence intervals, and socio-economic indicators.
- Identified stratified sampling as the most reliable approach.

Sales Performance Dashboard | Power BI

- Developed interactive dashboard tracking KPIs, monthly trends, revenue, and category performance.
- Used Power Query and DAX for data transformation and reporting automation.

Extinction Protocol Interactive Game | C++

- Designed and developed a complete interactive application using OOP, UI logic, and testing.
- Demonstrated strong software development, debugging, and system design skills.

TECHNICAL TOOLS

SAS • Python • SQL • Power BI • Excel • Power Query • C++ • Java • GitHub • HTML/CSS

ADDITIONAL VALUE

- Strong accuracy and quality-control mindset
- Fast learner with high adaptability
- Able to work independently or within teams
- Strong report writing and presentation skills
- Open to Data Analyst, Statistician, Biostatistics, Statistical Programmer, Risk Analyst, Research Analyst, Business Intelligence, and Quantitative roles
